The PAL Group under its brand name Fensys announce the next evolution in its natural plastic composite deck board offering.

Fensys have introduced a redesigned plastic composite board that offers advantages over other composite products available.

- Matching 40mm x 40mm x 5mm Thick Angle Section.
- Added feature lines to improve water run off.
- Improved pattern giving better wet and dry slip resistance.
- Reversible board with both traditional lined and wood grain effect patterns.
- Profile enhanced to give greater strength.
- Available in two natural tone finishes.
- Efficient 16ft lengths available quickly from stock.
- Low cost yet robust nylon fixing clips.
- A green product uses recycled plastic & wood waste.

Fensys also offer a range of complimentary maintenance free decking accessories including a galvanised metal sub-frame.
